Audit Findings

60%
Faster Incident Response

100%
Compliance-Ready Reporting

THE CHALLENGE

Faced intense regulatory pressure to meet and document compliance for mandates like the Gramm-Leach-Bliley Act (GLBA) and SEC requirements.

As a prime target for cyberattacks, they needed advanced protection for sensitive Non-Public Information (NPI) and customer financial data.

Their previous incident response lifecycle was too slow to effectively mitigate modern threats, increasing the risk of significant financial loss.

THE SOLUTION

Deployed ThreatRemediate: Ultimate / Gold Tier, providing enterprise-grade defense with 24/7 SOC-led threat hunting and response

Implemented Managed Identity Threat Detection and Response (ITDR) to protect against credential misuse and prevent fraudulent access to financial systems.

Utilized Vijilan's Extensive Compliance Reporting & Audit Support module to generate the precise, audit-ready documentation required for regulatory reviews.

For us, compliance isn't optional—it's foundational to our business. Vijilan's ThreatRemediate Ultimate service not only hardened our defenses against sophisticated attacks but also transformed our audit process. The detailed compliance reporting they provide is a game-changer.

Chief Compliance Officer, Regional Bank

THE VIJILAN DIFFERENCE

Compliance & Audit Expertise

We understand the unique regulatory pressures of the financial industry and provide solutions with built-in, audit-ready reporting.

Active Remediation

Our SOC's ability to perform full threat containment and remediation is critical when protecting high-value financial assets from active attacks.

Trust & Certification

Vijilan's own SOC 2 Type 2 certification provides an essential layer of assurance for security-conscious financial clients.
