APPROACH COMPARISON

Platform	Approach	Key Strength	Best For
CrowdStrike Falcon Identity (Vijilan)	Unified with endpoint, cloud-native	Native EDR correlation, lateral movement tracking	Organizations seeking a unified security platform
Microsoft Defender for Identity	Microsoft-native, AD-focused	Deep Microsoft ecosystem integration	Microsoft-only or M365-centric environments
Semperis	AD recovery and protection specialist	AD backup, recovery, tier-zero protection	Organizations prioritizing AD disaster recovery
Silverfort	Identity-based Zero Trust	MFA everywhere, risk-based authentication	Zero Trust enforcement use cases
Tenable.ad (Aldis)	AD security posture management	Misconfiguration detection, identity hygiene	Active Directory hardening focus

KEY DIFFERENTIATORS

Why CrowdStrike Identity (via Vijilan) Wins

Unified Platform

Identity + endpoint + cloud
in one console, one agent.

Lateral Movement

Native correlation with
endpoint data shows full
attack path.

Managed by Experts

24/7 SOC monitoring
identity threats—not just
alerts.

No Additional Agents

Same Falcon agent
protects endpoints AND
identity.

Cloud + On-Prem

AD and Entra ID in one
solution.
